

Student Success Engineer (Part-time)

Devslopes is looking for a motivated, tech-focused person to help our students have success. The ideal candidate is a programmer or someone who is learning to code but also someone who enjoys working with people.

Responsibilities include:

- Onboarding new students
- Managing lists of all active students
- Keeping students on track and on schedule through pro-active outreach
- Following up with less-active students
- Reviewing weekly reports and bringing student concerns to the team's attention

Features of the role:

- Write code on internal Devslopes projects (Get experience for your first job)
- Get regular code reviews from engineers on our team (Upgrade your skills)
- LinkedIn recommendation from senior management

The soul of this position is to help students have success with Devslopes Academy. Because the program is flexible without live classes it is easier for students to get distracted or side-tracked. Your job will be to ensure that the people in our program remain active and have success in their goals to become paid developers.

Other notes:

- This is a part-time role and requires no specific hours, but is highly results-oriented.
- This is a contract position
- It pays \$1000 / month (probably around 20-25 hours a month)
- In the future, if this role/strategy is successful, our hope is to make this a full-time position
- Candidate must reside in USA, EU, UK, or Canada

To apply:

1. Email mark@devslopes.com
2. Put "Apply" in the subject line
3. Send me a Loom video talking about your goals and why you think this might be a good fit for you right now
